MINISTRATION

# BLUE ADMINIS

Mr. Howard F. C. Thomas  
Associate Superintendent

Best wishes for continued success, at such an early age? Without a measurable degree of success you certainly could not be graduating from Blue Ridge High School - its fifteenth class.

We have all - whether school director, administrator, teacher or other school employee - attempted to provide you with the best opportunities at our command to prepare you for chosen futures. Don't stop with your first true indication of success - keep climbing toward higher goals.

VICE PRESIDENT  
Dr. Park M. Horton

The various antagonism of this changing world make the future of education so uncertain. These uncertainties create barriers in the minds of men which can lead only to social and intellectual chaos. Hence it is imperative that educational systems throughout the world should embrace as an immediate objective, the development in the hearts and minds of all individuals, the capacity, desire, and determination to understand their fellowmen, to respect them, and to act in unity with them.

If this aim is recognized as valid and necessary, then common sense requires that everything which concerns it (institutions, spirit, curriculums, methods) should contribute to the efforts to achieve it. It is then from this point of view that we should envisage the function of public education in our day.
